PY 803R pressure recorder

Description

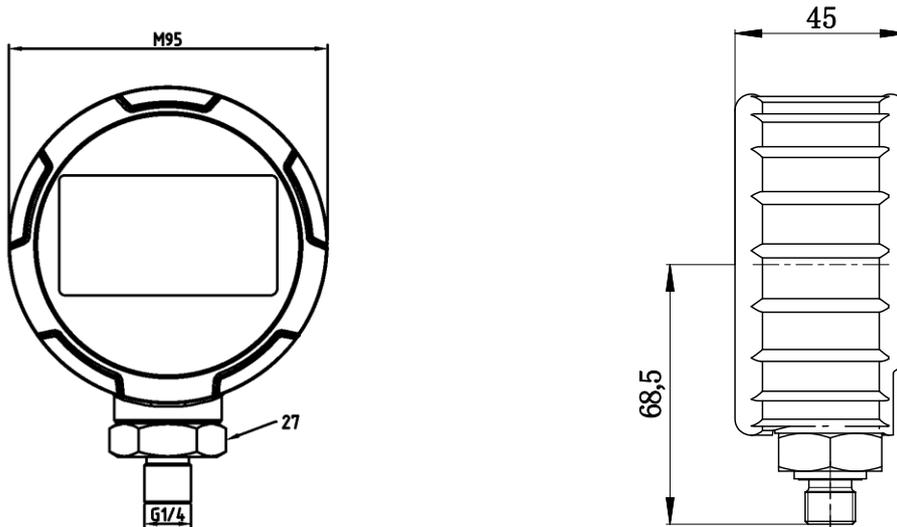

PY803R high precision pressure recorder is mainly used for pressure recording in different environments. The product can record 100,000 readings, the storage capacity in similar products is relatively large, power interruption data will not be lost. It can be connected by USB, and the data can be exported to EXCEL table by simple operation with mouse.

It can also be used as a pressure standardizer to complete the calibration of a variety of pressure instruments such as general pressure gauges, precision pressure gauges, etc.

Note:

The compensation temperature for 0.02 %FS is 20 ± 5 °C. The compensation temperature for 0.05 % FS is 0-50 °C. If the pressure is less than 100 mbar, the measuring medium is Gas. For pressures greater than 100 mbar, the measuring medium is Liquid or Gas.
